The application has been amended as follows: in the specification added the abstract as following:

Abstract ✓

The invention relates to the field of grating structures. The invention provides a longitudinal grating having an aperiodic structure, wherein the grating has a selected response characteristic and any repeated unit cell in the structure is significantly longer than a characteristic length associated with the selected response characteristic.

REASON FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: the claims are allowable over prior art of record, since none of the references in alone or in combination discloses:

A configurable aperiodic grating device comprising:

- a plurality of grating elements having a characteristic attribute, said grating elements being arranged so as to produce an actual first spectral

response of the aperiodic grating device that matches a desired first spectral response; and

- a plurality of actuating elements formed on said aperiodic grating device that generates the first spectral response, said plurality of actuating elements capable of altering the actual first spectral response to produce at least one second actual spectral response that matches a desired second spectral response, as discloses in claim 116, or **the method of producing a configurable aperiodic grating device**, as discloses in claim 125, and an **optical waveguide device** comprising a waveguide layer adapted to propagate electromagnetic radiation; and a configurable aperiodic grating device, as discloses in claim 135.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
